MILANO DIGITAL

XEROGRAPHIC / LASER TONERS

Important Information

Milano Digital offers after market brands of toner that are more economically priced than the OEM toners such as Xerox, Oce, etc. These after market toners in most cases are of better quality than the OEM product and last a bit longer. These compatible products should preform to your standards and save you money.

These compatible toners will not void your manufacturers warranty!! It is illegal for your vendor or manufacturer to tell you they will void your warranty if you continue to use compatible products. This anti-trust statute protects you from being intimidated by your vendor or printer manufacturer. If they do suggest that the toner is hurting your printer they must conclusively prove that the toner you are using has damaged your machine. Get it in writing!!!!

| Manufacturer | Item # | Machine and Toner Type | Price |
