Products and sizes subject to change. Suggestions made concerning uses, applications and compatibility are only the opinion of Milano. They are provided as a guide only and shall in no event constitute a warranty of any kind. The user assumes all risk from the use of these products and must confirm suitability thereof by his/her own tests. Our liability will in no event exceed the dollar value of the material sold. If at any time Milano-branded media fails to meet our specifications please return printed and unused portion for a full credit or exchange.

Milano Digital manufactures and distributes our internationally acclaimed Milano product line - a full line of color graphics inkjet media, lamination films, inks and cartridges. In addition, we have one of the industry's largest assortment of CADD media, allowing us to offer our customers a wide range of products for their ever-changing needs.

Since 1982 Milano has been an industry leader driven to meet the diverse needs of our customers. Our extensive experience in CADD and digital color graphics keeps us on the leading edge of these markets.

With offices in Los Angeles, Denver, Chicago , Milano provides on-demand converting, packaging and shipping, ensuring rapid response as well as maximum flexibility in meeting our customers' requirements.

At Milano, service does not end with the sale. We believe that ongoing support is an important part of the relationship with our customers. We offer experienced technical support. We don't just sell products - we help our customers maximize their applications.

If you succeed, we succeed.

Thermal Inkjet Bond / Photographic

UltraBond 36

36 lb. Coated Bond

UltraBond 36 is a cost-efficient, heavy-weight bond offering excellent printability for light-coverage graphics. A bright white, matte base accepts medium ink coverage and promotes bright vibrant colors. This media can be used with dye-based or pigmented inks on a wide variety of printers and laminates well with thermal or pressure-sensitive lamination films as well as ProTect lamination spray. It is perfect for courtroom graphics, simple graphics and line or text work.

Compatibility Code: U

Roll sizes:
24" x 100'
36" x 100'
42" x 100'
50" x 100'
54" x 100'

UltraBond 46

46 lb. Coated Bond

UltraBond 46 is similar in characteristic to UltraBond 36, but is slightly heavier in weight and accepts heavier ink saturation for bright vibrant colors. This media can be used with dye-based or pigmented inks on a wide variety of printers and laminates well with thermal or pressure-sensitive lamination films as well as ProTect lamination spray. It is perfect for courtroom graphics, simple graphics and line or text work.

Compatibility Code: U

Roll sizes:
24" x 100'
36" x 100'
42" x 100'
50" x 100'
54" x 100'
60" x 100'

Gloss Plus

7 mil Resin-Coated Photo-Base

This economical photo-base paper offers excellent dot gain control, allowing for the best possible resolution. A bright white, high gloss base accepts heavy ink coverage and promotes bright vibrant colors. This media can be used with dye-based inks on a wide variety of printers and laminates well with thermal or pressure-sensitive lamination films. It is also compatible with ProTect lamination spray. Gloss Plus is perfect for photographic applications, indoor banners and signage, full-color posters and presentations.

Compatibility Code: N, H, C

Roll sizes:
24" x 100'
36" x 100'
42" x 100'
50" x 100'
54" x 100'
60" x 100'

Satin Plus

7 mil Resin-Coated Photo-Base

This economical photo-base paper offers excellent dot gain control, allowing for the best possible resolution. A bright white, satin base accepts heavy ink coverage and promotes bright vibrant colors. This media can be used with dye-based inks on a wide variety of printers and laminates well with thermal or pressure-sensitive lamination films. It is also compatible with ProTect lamination spray. Satin Plus is perfect for photographic applications, indoor banners and signage, full-color posters and presentations.

Compatibility Code: N, H, C

Roll sizes:
24" x 100'
36" x 100'
42" x 100'
50" x 100'
54" x 100'

Thermal Inkjet Film / Banner Media

PolyGloss

4 mil White Opaque Film

PolyGloss is a durable, polyester film that offers excellent dot gain control, allowing for the best possible resolution. A bright white, high-gloss base accepts heavy ink coverage and promotes bright vibrant colors. This media can be used with dye-based inks or pigments on a wide variety of printers and laminates well with thermal or pressure-sensitive lamination films as well as ProTect lamination spray. It is perfect for photographic reproductions, posters, backlight displays and display graphics when used with our PS SR Hard Vinyl laminates.

Compatibility Code: U

Roll sizes:
24" x 100'
36" x 100'
42" x 100'
50" x 100'
54" x 100'
60" x 100'

Backlight 2

5 mil View-Thru Polyester Film

Backlight 2 is a durable, polyester view-thru (reverse print) film with a diffuser coating. View side is glossy - print side is matte. A specially engineered coating accepts heavy ink coverage and promotes bright vibrant colors. This media can be used with dye-based or pigmented inks on a wide variety of printers and laminates well with thermal or pressure-sensitive lamination films as well as ProTect lamination spray. Made specifically for backlight displays.

Compatibility Code: U

Roll sizes:
24" x 100'
36" x 100'
42" x 100'
50" x 100'
54" x 100'
60" x 100'

Lexmatte Clear

10 mil Clear Polycarbonate

Lexmatte Clear is a clear reverse-print polycarbonate film that is the finest in the industry. A velvet-textured first surface and a reverse-print clear coating on the second surface allow superior detail resolution and outstanding true-color graphics that dry instantaneously. Lexmatte Clear is perfect for trade show display graphic panels, backlit graphics, floor graphics, architectural signage, or any application requiring a durable non-glare finish and/or protective surface. Most aqueous dye inks printed with a thermal or piezo inkjet printer are compatible. Use of pigment inks is dependent on application

Compatibility Code: U

Roll sizes:
36" x 60'
50" x 60'

Lexmatte Frosted

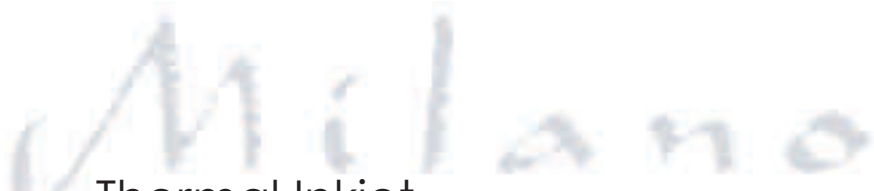

10 mil Frosted Polycarbonate

Lexmatte Frosted is a frosted reverse-print polycarbonate film that is the finest in the industry. A velvet-textured first surface and a reverse-print frosted coating on the second surface allow superior detail resolution and outstanding true-color graphics that dry instantaneously. Lexmatte Frosted is perfect for trade show display graphic panels, backlit graphics, floor graphics, architectural signage, or any application requiring a durable non-glare finish and/or protective surface. Most aqueous dye inks printed with a thermal or piezo inkjet printer are compatible. Use of pigment inks is dependent on application.

Compatibility Code: U

Roll sizes:
24" x 60'
36" x 60'
42" x 60'
50" x 60'

36" x 100'
42" x 100'
50" x 100'
54" x 100'
60" x 100'

Clearfilm

4 mil Polyester Film

Clearfilm is a durable polyester film that offers excellent dot-gain control, allowing for the best possible resolution. An optically-clear base promotes bright vibrant colors. This media can be used with dye-based inks on a wide variety of printers. It is perfect for clear overlays, window graphics, and mapping applications. It laminates well with thermal or pressure sensitive lamination films. Clearfilm is sidestriped for use in HP printers.

Compatibility Code: N, H, C

Roll sizes:
24" x 75'
36" x 75'
42" x 75'
50" x 75'

Banner Tuff

12 mil Flexible Polyolefin

Banner Tuff is an extremely tough and durable film. It is perfect for indoor signs, displays and banners. The material can be punched, sewn or grommetted and hung without tearing. It is designed for excellent print quality, with exceptionally quick drying time and works well on many popular wide format thermal and piezo printers. Compatible with dye or pigment inks.

Compatibility Code: U

Roll sizes:
24" x 75'
36" x 75'
42" x 75'
50" x 75'
54" x 75'

*If you are interested in products not found in this catalog: WE CAN HELP. Milano carries a wide range of "special order" items. Please contact us for more information.

Artist Canvas

19 mil Cotton/Poly blend

This artist-grade canvas has a durable, scratch-resistant, low-glare coating. Specially engineered, it accepts heavy ink coverage and promotes bright vibrant colors while maintaining excellent dot gain. This media can be used with dye-based or pigmented inks on a wide variety of printers. It can be protected with our ProTect lamination spray and is perfect for art or photographic reproductions.

Compatibility Code: U

Roll sizes:
24" x 40'
36" x 40'
42" x 40'
50" x 40'
54" x 40'
60" x 40'

100% Cotton available as special order

Vinyl Gloss

4 mil Calendered Adhesive Vinyl

Vinyl Gloss is a flexible, white vinyl film with a permanent, pressure-sensitive acrylic adhesive. It is backed with a two-sided, poly-coated, lay-flat release liner. This media can be used with dye-based inks on a wide variety of printers and is perfect for signage, posters and displays. It laminates well with pressure-sensitive lamination films or ProTect lamination spray. This calendered vinyl is easy to smooth around irregular surfaces.

Compatibility Code: N, H, C

Roll sizes:
24" x 50'
36" x 50'
42" x 50'
50" x 50'

Vinyl Matte

4 mil Calendered Adhesive Vinyl

Vinyl Matte is a flexible, white vinyl film with a permanent, pressure-sensitive acrylic adhesive. It is backed with a two-sided, poly-coated, lay flat release liner. This media can be used with dye-based inks on a wide variety of printers and is perfect for signage, posters and displays. It laminates well with pressure-sensitive lamination films or ProTect lamination spray. This calendered vinyl is easy to smooth around irregular surfaces.

Compatibility Code: N, H, C

Roll sizes:
24" x 50'

Milano

Thermal Inkjet Fabrics

Milano Inkjet Fabric Media

- All cloth materials can be used with water-based, dye or pigmented inks except for the WF Poly Cloth, which must be used with pigmented inks for best results.
- Materials are compatible with most printers currently on the market, including Encad, HP, Roland HiFi, ColorSpan and Epson.
- Use either dye-based or pigmented ink for indoor use, and pigmented ink for outdoor use.
- Perform an ink limit test for each fabric. Use a setting approximately 10% below the optimal saturation limit.
- Ink must be allowed to dry thoroughly before handling or smudging may occur.
- Ink limits and profiling may be performed on fabrics just like on paper.
- When printing, care should be taken to ensure that the leading edge of the fabric is flat so that head strikes do not occur.
- When the print is dry remove the paper backing.
- The fabric can be finished with grommets or pole pockets.
- Hang your project indoors or out, but for outdoor applications print and dry thoroughly and rinse with cool water. Do not scrunch or compress the print or some color may migrate to white areas. After rinsing the media will be ready to hang outdoors.

50" x 60'

WaterFast Scrim Vinyl

15 mil Scrim Vinyl

WaterFast Scrim Vinyl is an economical alternative to our standard WaterFast Banner Vinyl. It is a durable vinyl with a water resistant, low glare coating and a blackout layer for opacity. A specially engineered coating accepts heavy ink coverage and promotes bright vibrant colors while maintaining excellent dot gain. This media can be used with dye-based or pigmented inks on a wide variety of printers, and laminates well with pressure sensitive laminates, as well as our ProTect Lamination Spray, and is perfect for outdoor or indoor banner and displays.

Compatibility Code: U

Roll sizes:
24" x 40'
36" x 40'
42" x 40'
50" x 40'
54" x 40'
60" x 40'

WaterFast Poly Pro Matte

7 mil WF Poly Pro Matte

This is a waterfast matte version of our popular Poly Pro series of tear resistant materials. It is made of durable polypropylene with incredible tear strength and offers a scratch resistant surface. It is engineered to accept heavy ink coverage while controlling dot gain. This media can be used with dye-based or pigmented inks on a wide variety of printers, and laminates well with pressure sensitive laminate, as well as our ProTect Lamination Spray. This media is perfect for indoor or outdoor banners and posters, especially in high humidity climates.

Compatibility Code: U

Roll sizes:
24" x 100'
36" x 100'
42" x 100'
50" x 100'
54" x 100'
60" x 100'

Waterfast Backlit Film

5 mil Polyester Film

A polyester film with an outdoor receptive inkjet layer on one side and translucent white layer on the reverse side. Works well with both dye and pigmented inks in outdoor backlit applications such as exhibits and high visibility signage.

Compatibility Code: U

Roll sizes:
24" x 100'
36" x 100'
42" x 100'
50" x 100'
54" x 100'
60" x 100'

51" x 150'

61" x 150'

5 & 15ml only

1 Mil Dry Erase Laminate

1 mil Clear Polypropylene with Permanent Acrylic Adhesive

A clear polypropylene with permanent acrylic adhesive. Use with dry erase markers and wipe clean with dry tissue or dry erase cleaning fluid.

Roll sizes:

38" x 150'

51" x 150'

ProTect

Professional Inkjet Lamination Spray

ProTect is an alcohol-based spray that renders inkjet prints highly water- and scratch-resistant, as well as increasing light-fastness of a print up to 5 times. This spray dramatically reduces color shift when fading occurs. This means all colors will fade at a more equal rate. Ozone friendly - no organic solvents. 400 ml can will cover up to 70 sq. ft., depending on application.

Can Size:

400 ml

12 cans/case

500 litre bottle

Mounting / Backing Films

● ● ● Lamination

Gudy Window

3 mil Clear Mounting Adhesive

Gudy Window is a double-sided mounting film designed for bubble-free face mounting. The adhesive is produced with micro-grooves, allowing for easy evacuation of all air bubbles. Now you can mount posters to glass or clear acrylic panels with a simple hand squeegee.

Gudy Window has a permanent adhesive that applies to the image and a removable adhesive that applies to the glass

Roll sizes:

37.4" x 164'

48.8" x 164'

Gudy 802

3 mil Clear Mounting Adhesive

Gudy 802 is a double-sided, thin mounting film with a clear carrier for mounting to various substrates such as plastic or glass. This pressure-sensitive film is perfect for backlight displays.

Roll sizes:

25" x 164'

41" x 164'

51" x 164'

61" x 164'

Gudy 808

3 mil Mounting Adhesive

Gudy 808 is a double-sided mounting film with a white carrier that minimizes show-through. It has the same permanent, pressure-sensitive adhesive on both sides for maximum performance.

Roll sizes:

25" x 164'

38" x 164'

41" x 164'

51" x 164'

54" x 164'

61" x 164'

Crystal Clear Mount

1 mil Optically Clear Backer

Optically clear face mounting film with two-sided permanent adhesive. This pressure-sensitive film is perfect for mounting inkjet, photographic and electrostatic prints to clear acrylics, glass and plastics. Crystal Clear Mount adhesive includes UV inhibitors to help protect images from fading.

Roll sizes:

38" x 164'

51" x 164'

60" x 164'

DI White Backing Film 7/3

10 mil Thermal Backer

A white, low-melt, heat-activated backing film. Excellent for trade show graphics.

7 mil polyester, 3 mil heat-activated adhesive

Roll sizes:

38" x 250'

51" x 250'

PS10 Vinyl Backer

10 mil PS Backer

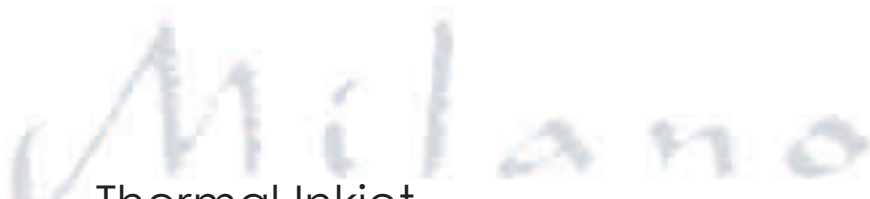

A white, pressure-sensitive backing film that is less rigid than our 15mil Vinyl Backer. It has a permanent adhesive to eliminate tunneling. It is excellent for trade show graphics.

Roll sizes:

38" x 75'

51" x 75'

Solvent Poly Print

10 mil Special Poly

This 10 mil specially formulated poly based product is now available in 54" wide rolls. Solvent poly print will print with the same quality as photo quality paper on thermal and piezo head printers with water based inks. This product will also thermal laminate 5 times better than paper and is guaranteed not to delaminate, even without leaving a menu edge.

Roll sizes:
54" x 200'
54" x 25'
